BŁAŻEJ BARTOSZEWSKI

FRONTEND DEVELOPER (FULLSTACK-READY)

I'm a frontend-focused developer with fullstack experience, passionate about clean code, UI/UX, and continuous learning.

I've contributed to real-world projects like Justfitup, and currently work as a developer at CodeWorlds, where I grow through practical, hands-on experience.

My technical foundation was built through the GoIT Fullstack Developer course, complemented by training in manual testing at Coders Lab and self-driven study of JavaScript and modern frameworks.

I'm detail-oriented, curious by nature, and enjoy solving problems through both code and communication. I'm also actively improving my English skills with a native tutor.

Outside of coding, I love riding chopper motorcycles, exploring gravel trails, playing volleyball, and discovering new culinary experiences.

CONTACTS:

- tel: 784 172 218
- blazejbart@gmail.com
- Portfolio
- LinkedIn
- GitHub

TECHNICAL SKILLS:

- HTML
- CSS
- Tailwind CSS
- JavaScript
- TypeScript
- React.js
- Redux
- Next.js
- Node.js
- REST API
- MongoDB
- Supabase
- Git
- GitHub

SOFT SKILLS:

- Effective communication
- Collaborative mindset
- Stress resilience / performance under pressure
- Analytical thinking

Play (Mobile Network Operator)
2015-2017

- IT support.
- Solving technical problems.
- Customer interaction and support.
- Acquiring new customers and maintaining positive relationships with existing customers.

PROJECT EXPERIENCE

LEARN REACT.JS WITH AI
Technologies: [TypeScript, Next.js, OpenAI, Clerk, Tailwind CSS, shadcn]

An interactive web app that helps users practice React.js by generating random interview-style questions. Users record voice answers, which are transcribed and evaluated using AI (OpenAI's GPT API). The AI checks for correctness and provides constructive feedback, simulating a real interview experience.

Repository
Visual page

FORM CREATOR
Technologies: [TypeScript, Next.js, Tailwind CSS, shadcn]

A web application for building customizable dynamic forms. Users can define input types, labels, and validation rules through an intuitive UI. The form configuration is instantly reflected in a live preview, allowing for easy iteration and testing.
