ABOUT ME

Full-stack developer with a frontend core (React, Next.js, TypeScript) and backend experience in NestJS and PostgreSQL. I build AI features into real business workflows: on RITS HUB, a CRM replacing HubSpot, I delivered approval flows, audit trails, RBAC and GDPR handling; at an early-stage startup I build Claude-powered agents and integrations with Twilio, Notion, Zoom and MS Teams. A manual-testing background makes me careful about edge cases, permissions and accessibility.
